Dear Stacey,

I am writing this letter as a compliment to Stacey Stone, Chesapeake Soda Clean and The Soda Works.

As we always have for many years, we attended the annual 2010 ARA "Rental Show" last year in Orlando Florida to research new equipment product lines to add to our rental fleet.

As we were walking the trade show we came upon The Soda Works which had a display of his soda blasting equipment along with a presentation of the many uses for this equipment. We already own other types of abrasive (silica sand - black beauty) blasting equipment and we thought this soda blasting product would add a new market and complement our existing fleet.

We purchased a complete soda blast package in April 2010 and within 9 months we have surpassed our "Return on Investment" on the net equipment cost and have sold over 20,000 pounds of soda media.

The equipment is very simple to operate, which our customers love, and we have not had any mechanical failures or problems other than a few basic "wear and tear" replacement items.

From day one of our commitment to Chesapeake Soda Clean, Stacey has been extremely supportive and committed to ABC Equipment Rental, from the initial delivery, set-up and training to follow up operating, service and maintenance questions and solutions. He has been very responsive for all of our needs from replacement parts to short notices on our soda media requirements.

Overall ABC Equipment Rental has been extremely satisfied with the Chesapeake Soda Clean and The Soda Works product and support and would highly recommend this equipment for any type of rental fleet or contractor use.

Best Regards,
Lee Lightner - President
